

# Virtual Nursing

Hello!

We are pleased to announce that our school will be offering virtual nursing on-site with the use of a TytoCare Unit (see below). In partnership with Bellin Health, this unit is intended to provide access to certified nurses that can perform triage for students. After the assessment, the nurse will reach out to you to share any updates and recommendations. If further treatment is needed, the nurse will work with your preferred provider. This service is at NO COST to students/families and will not be billed through insurance.

In order to move forward with this program, please fill out the following items and return to school:

1. **Bellin Health Communication Consent Form** – Allows nurse to communicate with school staff and approved guardians/adults.
2. **Bellin Health Registration Agreement** – Allows nurse to use electronic medical record to document visit details.
3. **School Release of Health Information** – Protects the student's education records.

\*Please fill out ALL highlighted fields on each form.

When your forms are completed, please return to the school office as soon as possible.

Thank you.
